

OneAscent Target Retirement 2060 Fund

OneAscent

CUSIP 68266T508

First Quarter | 3.31.2023

FUND OBJECTIVE

The investment seeks high total return with a shift to current income and some capital preservation over time as the fund approaches and passes the target retirement date. The fund provides diversified exposure to a variety of asset classes, and over time the fund's asset allocation strategy will change. The fund is generally intended for investors expecting to retire around the year 2060 (target retirement date).

FUND STRATEGY

To achieve the fund's objective, the Investment Manager adheres to a well defined investment process comprised of four primary components - Strategic Allocation, Manager Selection, Tactical Allocation, and Portfolio Monitoring.

Strategic Allocation: Strategic allocation combines OneAscent's long-term capital market assumptions and the target date glidepath. The result is in asset allocation framework with long-term target weightings for each point in the fund's expected lifecycle.

Manager Selection: Investment managers are evaluated using quantitative and qualitative analysis as well as based on their ability to implement OneAscent's values-based screens. OneAscent's quantitative scorecard assesses potential managers against their peer groups and benchmarks in the areas of performance track record, risk management, and cost efficiency. The qualitative evaluation seeks to understand the potential manager's investment philosophy, processes, and people. Current and potential investment managers are continually evaluated for conviction and strategic fit within the investment strategy.

Tactical Allocation: Tactical allocation is intended to complement the strategic core of the fund with the goal of capitalizing on near-term opportunities. The Investment Manager utilizes a proprietary, rules-based decision making process to navigate the current market and economic environments.

Portfolio Monitoring: The Investment Manager meets regularly to review strategic and tactical allocation decisions and to monitor current investment managers for their ability to create sustaining long-term value.
