

OneAscent designs investment strategies that align with Kingdom values. This approach considers fundamental investment research, including manager evaluation, potential growth opportunities, and risk management. OneAscent uses portfolio managers who are experienced in managing particular asset classes. Portfolios are offered in five risk-based models to meet each client's financial goals.

### Investment Objective:

Capital Appreciation

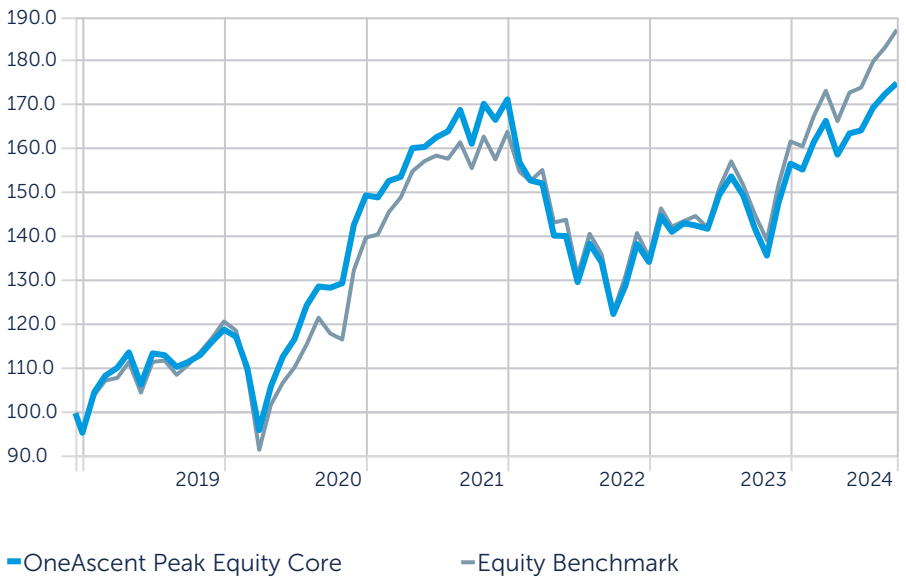

### Weighted Model Fee:

0.38%

OneAscent Peak Equity Core	24.54	25.65	14.59	-21.58	16.63
Equity Benchmark	26.38	15.78	17.20	-17.35	19.36

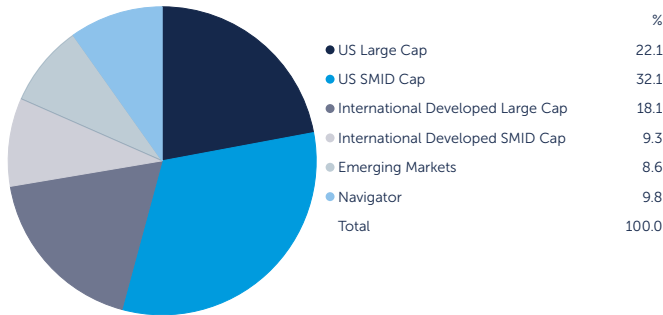

OneAscent Investment Solutions LLC ("OneAscent") was formed in March 2017, and manages a variety of equity, income and balanced asset strategies for client accounts. OneAscent is an investment adviser registered with the United States Securities and Exchange Commission. Registration as an investment adviser does not imply any certain degree of skill or training. OneAscent's Form ADV Part 2A is available on its website, [www.oneascent.com](http://www.oneascent.com), or the SEC's website, at [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov), or by contacting the firm. Please consult OneAscent's Form ADV Part 2A for information regarding account minimums and fees.

As of September 2022, the OneAscent Peak Equity Builder and OneAscent Peak Equity Core models were combined, with the current OneAscent Peak Equity Core model being the surviving combination of the two. The historical (pre September 2022) performance of this model includes the past performance of the OneAscent Peak Equity Builder model, as this model is the model that most closely resembles the current OneAscent Peak Equity Core model.

From model inception to October 1st, 2023, OneAscent Investment Solutions used 25bps as the amount of fees to be imputed to arrive at a net performance number. All net performance calculations as of October 2nd, 2023, will use a 35bps fee amount which OAIS believes is a better estimate of the highest potential expense for an investor in this strategy.

Performance information for the attached strategy is calculated using model performance and is based on the portfolio allocation data since inception. The strategy has not materially changed since inception. Model performance is net of any fees on the underlying mutual funds and ETFs, management fees of any underlying model portfolios, and a strategist fee of 0.25% applied annually to the entire strategy. The model performance does not include any overlay fees, brokerage fees, or commissions. OneAscent is unaware of what the exact amounts of these fees will be on a client by client basis, and cannot reasonably estimate their costs. OneAscent is unaware of what the exact amounts of these fees will be on a client by client basis, and cannot reasonably estimate their costs. Performance for periods longer than a year has been annualized. Model performance means that while actual client accounts will be managed as closely to the model as possible, the performance reported is for the targeted portfolio allocations for the strategy and not a composite of actual client accounts. Accordingly, individual client performance may vary according to various factors, including fee arrangements, withdrawals, contributions, and tax considerations, among other factors. OneAscent does not control the fee amounts charged by recommending advisers. A complete listing of all trades in the model, as well as a full description of the model/strategy are available upon request.

### Portfolio Composition

### Market Risk - Since Inception (12/13/2018)

	Std Dev	Beta	R2
OneAscent Peak Equity Core	16.61	0.90	95.11
Equity Benchmark	17.95	1.00	100.00

The benchmark used for this strategy is a blend of three broad based market indices and benchmark performance is calculated by Morningstar. Blended benchmarks are rebalanced back to their target weights each calendar year. The three broad market indices are S&P 500, Russell 2500, and MSCI ACWI ex USA. The S&P 500 is a market cap-weighted index of the 500 largest U.S. publicly traded companies. The Russell 2500 is a market cap-weighted index that includes the smallest 2,500 companies covered in the Russell 3000 universe of U.S. companies. The MSCI ACWI ex USA (Morgan Stanley Capital International All Country World Index Ex-U.S.) is a market-cap weighted index designed to provide a broad measure of stock performance throughout the world, with the exception of U.S.-based companies. Index performance is for illustrative purposes only. Index performance does not reflect any management fees, transaction costs, or expenses. Indexes are unmanaged and one cannot invest directly in an index.

The strategy is not necessarily appropriate for any particular client or investor. Accordingly, any reader of the attached description should not interpret the attached as investment advice. All investments bear a risk of loss, including the loss of principal that the investor should be prepared to bear. The use of any chart or graph in the attached is not intended to be viewed as a singular aid in determining investment strategy. Such visual aids are instead intended as a complement to other data, and like such other data, should be considered in light of consultations with professional investment tax and legal advisors. Past performance may not be indicative of future results. No current or prospective client should assume that the future performance of any specific investment, investment strategy (including investments and/or investment strategies recommended by the adviser), will be equal to past performance levels. Indices are reported to give a point of comparison only. An investor may not invest directly in an index. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for a client's investment portfolio.
