

## KEY UNIQUES

**Diversified Core U.S. Equity Exposure**

OALC is constructed to be a core holding for equity portfolio by providing diversified access to U.S. large cap companies.

**Index-Based Portfolio**

OALC seeks to provide index-like returns by investing in a portfolio optimized to perform similar to the S&P 500.

**Values-Aligned for Kingdom Impact**

OALC uses a proprietary screening process to elevate companies that align with faith-based principles and positively impact the world.

## AT A GLANCE

**Ticker:** OALC

**CUSIP:** 90470L527

**Exchange:** NYSE Arca

**Inception Date:** 11/15/2021

**# of Holdings:** 203

**Benchmark:** S&P 500 Index

**Assets Under Management:** \$120.1M

**Morningstar Category:** US Fund Large Blend

**Gross Expense Ratio:** 0.64%

**Net Expense Ratio:** 0.49%

Contractually agreed to limit total annual operating expenses to 0.49% of the Fund's average daily net assets through December 31, 2025.

## OBJECTIVE

The OneAscent Large Cap Core ETF seeks to **closely replicate the returns of the S&P 500 Index**, before deduction of expenses, using an investment universe that is subjected to the OneAscent Values-Based Screening process.

<sup>1</sup>The benchmark used for sector allocation is SPDR S&P 500 ETF TRUST (SPY).  
 Source: Bloomberg Finance L.P. and Morningstar Direct.

**Standard Deviation (Std Dev):** Measures the average a return series deviates from its mean. It is often used as a measure of risk. When a fund has high standard deviation, the predicted range of performance implies greater volatility.

**Beta:** A measure of the volatility, or systematic risk of a security or a portfolio in comparison to the market as a whole.

**Alpha:** Often considered the active return on an investment, gauges the performance of an investment against a market index or benchmark that is considered to represent the market's movement as a whole.

**R-squared:** A measure that indicates the extent to which fluctuations in portfolio returns are correlated with those of the index.

**Tracking Error:** The divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

**Top ten holdings:** As a percent of total assets, industry sectors, and asset allocation are presented to illustrate examples of the securities that the fund has bought and the diversity of areas in which the funds may invest and may not representative of the fund's current or future investments. Portfolio holdings are subject to change and should not be considered investment advice.

**Price/Book:** Price-to-Book Ratio is the weighted average of the price/book ratios of all the stocks in a portfolio.

**Price/Earnings Ratio:** Price-to-Earnings Ratio is the ratio for valuing a company that measures its current share price relative to its earnings per share (EPS).

**Price/Free Cash Flow:** Price-to-Free-Cash-Flow Ratio is the percentage amount of a company's free cash flow divided by its market capitalization.

**Price/Sales:** Price-to-Sales Ratio is the ratio for valuing a company that measures its current share price relative to its annual sales per share.

**Return on Equity %:** Return on Equity Percentage is the percentage a company earns on its shareholders' equity in a given year (Year 1, 2, etc.).

## Important Risk Information:

Exchange-traded funds involve risk including the possible loss of principal. Past performance does not guarantee future results.

The Adviser invests in equity securities only if they meet both the Fund's investment and values-based screening requirements, and as such, the returns may be lower than if the Adviser made decisions based solely on investment considerations.

Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, and periods of high volatility and disruption in the creation/redemption process of the Fund. These factors may lead to the Fund's shares trading at a premium or discount to NAV.
