

KEY UNIQUES

A Focus on Societal Impact

Through the OneAscent Elevate Screening methodology, we seek companies around the world whose goods and services advance the flourishing of society. A deep dive into a company's business model, stakeholder policies, and overall community impact helps us eliminate companies that do not share our values, allowing us to focus on companies our clients can be proud to own.

Unique Fundamental Framework

We believe companies go through a natural corporate Life Cycle, and understanding where in the Life Cycle a company lies is central to our fundamental investment process. Through quantitative tools, we segregate the investment universe into Life Cycle stages and attempt to more accurately identify a company's real asset growth and return on invested capital. Using this lens, we apply a rigorous fundamental analysis process to help identify companies more likely to create ongoing shareholder value.

Experienced Global Investment Team

The investment team is led by a portfolio manager with decades of investment experience in global equity markets. The team manages multiple, high conviction portfolio using the same rigorous bottom-up investment process.

Calendar Year Returns

	2023	2024
Market Price	17.95%	0.97%
Net Asset Value (NAV)	17.69%	0.42%
MSCI EM NR USD Index	9.83%	7.50%

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance current to the most recent month end, please call 1-800-222-8274

Fund NAV represents the closing price of underlying securities. Closing Market Price is calculated using the price which investors buy and sell ETF shares in the market. The Closing Market Price returns in the table were calculated using the closing price and account for distributions from the funds.

The total Fund operating expense is 1.25%. The Fund's adviser contractually has agreed to waive its management fee and/or reimburse expenses so that total annual Fund operating expenses, do not exceed 1.25% through December 31, 2025.

Investors should carefully consider the investment objectives, risks, and charges and expenses of the fund before investing. The prospectus contains this and other information about the fund, and it should be read carefully before investing. Investors may obtain a copy of the prospectus by calling 1-800-222-8274. The fund is distributed by Northern Lights Distributors, LLC, Member FINRA/SIPC, which is not affiliated with OneAscent Investment Solutions, LLC.

¹The benchmark used for sector allocation is IShares MSCI Emerging Markets ETF (EEM).
 Source: Bloomberg Finance L.P. and Morningstar Direct.

Standard Deviation (Std Dev): Measures the average a return series deviates from its mean. It is often used as a measure of risk. When a fund has high standard deviation, the predicted range of performance implies greater volatility.

Beta: A measure of the volatility, or systematic risk of a security or a portfolio in comparison to the market as a whole.

Alpha: Often considered the active return on an investment, gauges the performance of an investment against a market index or benchmark that is considered to represent the market's movement as a whole.

R-squared: A measure that indicates the extent to which fluctuations in portfolio returns are correlated with those of the index.

Tracking Error: The divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

Top ten holdings: As a percent of total assets, industry sectors, and asset allocation are presented to illustrate examples of the securities that the fund has bought and the diversity of areas in which the funds may invest and may not representative of the fund's current or future investments. Portfolio holdings are subject to change and should not be considered investment advice.

Price/Book: Price-to-Book Ratio is the weighted average of the price/book ratios of all the stocks in a portfolio.

Price/Earnings Ratio: Price-to-Earnings Ratio is the ratio for valuing a company that measures its current share price relative to its earnings per share (EPS).

Price/Free Cash Flow: Price-to-Free-Cash-Flow Ratio is the percentage amount of a company's free cash flow divided by its market capitalization.

Price/Sales: Price-to-Sales Ratio is the ratio for valuing a company that measures its current share price relative to its annual sales per share.

Return on Equity %: Return on Equity Percentage is the percentage a company earns on its shareholders' equity in a given year (Year 1, 2, etc.).

Important Risk Information:

Exchange-traded funds involve risk including the possible loss of principal. Past performance does not guarantee future results.

The Adviser invests in equity securities only if they meet both the Fund's investment and values-based screening requirements, and as such, the returns may be lower than if the Adviser made decisions based solely on investment considerations.

Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, and periods of high volatility and disruption in the creation/redemption process of the Fund. These factors may lead to the Fund's shares trading at a premium or discount to NAV.
